

Plant Conservation: Approaches and techniques from an Australian perspective

Order form

The manual - Ring binder version

In his foreword to the manual, Carl Binning, Chief Executive of Greening Australia has written: *"It will become one of the most well used tools in the kit of practitioners everywhere, whether they work in the paddock or the office. The manual draws on the expertise of some of the leading exponents of practical conservation in Australia. The techniques and methods have been tested and refined by a broad network of plant conservation practitioners."*

The manual contains a staggering array of quality information in 39 chapters written by specialists from across Australia, and overseas. The manual is based on the series of training courses that the ANPC has run to date, and covers a comprehensive range of topics to be considered when undertaking conservation and rehabilitation. The modules in the manual are:

- | | |
|--|--|
| 1. Principles and Ethics of Conservation | 7. Ecological Communities |
| 2. Conservation Instruments and Initiatives | 8. Propagating Threatened Flora for Conservation |
| 3. Getting Started: Information for Conservation | 9. Cryptogams |
| 4. Conservation in the Field | 10. Training |
| 5. Rehabilitation and Translocation | 11. References and Resources |
| 6. Monitoring and Adaptive Management | |

Context boxes, glossaries, key reading, cross referencing, reference lists, web sites and author contact details complement the detailed information contained in each chapter.
